Office CTI offers a massive range of features however it is most commonly known for screen pops, click to dial and integration with CRMs and databases. These functions can be applied to almost any workplace as inbound and outbound dialling form critical parts of all sales, marketing and accounts teams. Office CTI aims to give you the ability to maximise the functionality your phone system has to offer. This includes the complex feature functionality your phone system is packed with but often forgotten as they require complex key codes to use. CTI provides improvements in efficiency, accuracy and customer service, giving any business a more professional image and a competitive advantage.
