

DESKMATE

SIP SOFTPHONE

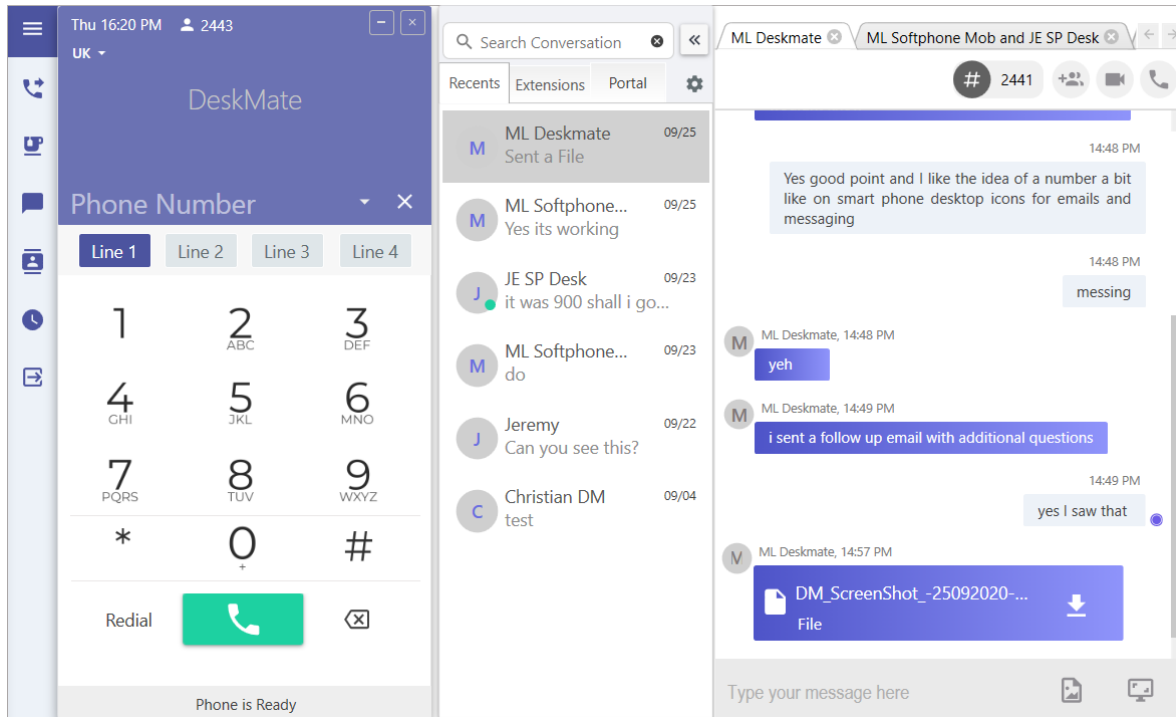

CommSoft RMS

5600 Maggie Run Lane, Fuquay Varina, NC 27526, USA | +1 919-586-7300

DeskMate is a SIP softphone application developed by CommSoft RMS for a distributed workforce. Specifically designed to work with existing and new Panasonic telephone systems. Providing users with a unified client that adds business telephone capabilities and much more to a device that individuals and team members already use such as a home PC or laptop.

Working from Home or Office

Simply log on at home, in the office, or on the move to provide all your office desk facilities. DeskMate provides real-time presence, messaging, and voice communication for any employee wherever they need to work.

Enhanced Interaction

DeskMate enables individual users to become available and operate as a team working together more efficiently with messaging, file sharing, presence, voice calling, and recording. DeskMate also works with the entire range of CommSoft business communications applications, forming a more unified solution no matter what type of business or where it has to operate.

Presence

See the status of other extension users in real-time enabling you to choose how to communicate in the most efficient and appropriate way.

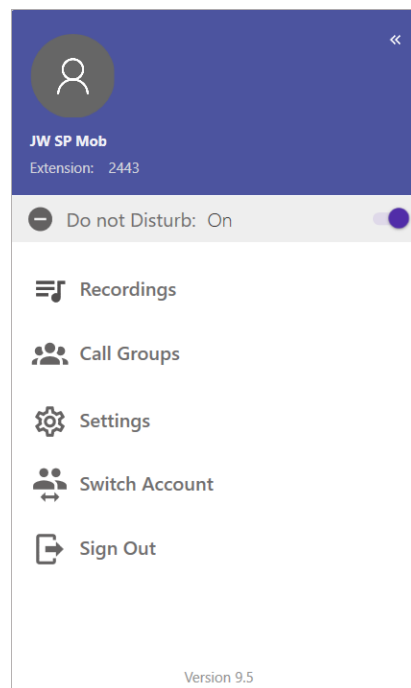

Break Modes & Absence Messages

Set Break Modes and Absence Messages so other users are aware of your availability.

Easier Visual Control

See what's happening and take control of all aspects of your communications with clear easy to use functions from your desktop wherever you need to work
